

What Makes Redmond Minerals Special?

Not all soil amendments and mineral supplements are created equal. All Redmond products are harvested from an ancient sea and bentonite clay deposit in central Utah. This unique mineral source is the foundation for life nourishing products enjoyed by plants, livestock, and humans alike. Our mineral salts and bentonite clay are harvested and packaged in separate operations, but we are also proud to offer many blended mixes of these two rare and rich resources.

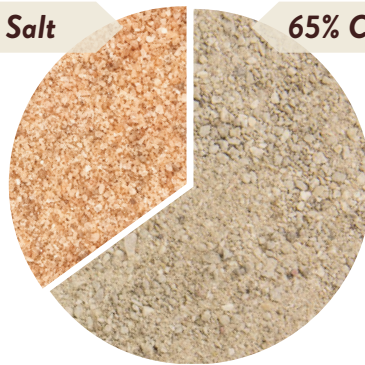

SR 65

All natural soil amendment and livestock supplement

35% Mineral Salt

65% Clay Conditioner

Redmond's mineral salts contain 60+ trace minerals perfectly balanced by nature...the Earth's ultimate health elixir. Our expansive mineral profile has many proven health benefits for soil, plants, and animals and has been used by farmers for over 50 years. These minerals are naturally blended within a mix of nourishing chloride salts.

Clay particles naturally attract and store certain substances from their environment.

Redmond's bentonite clay has attracted an expansive profile of trace minerals from its deep sea deposit neighbor.

These minerals are stored in the clay particles, ready to be released into the soil or living body where they are applied.

SR 65 for Soil Health

Apply dry or as a foliar spray to your land for more resilient, productive, nutrient dense, and delicious plants.

Mineral Salts

- Increases the electrical conductivity in the soil (which in turn, stimulates soil based microbial colonies)
- Contains over 60 trace minerals in a crystalline form that is easily accessible and highly available to plants
- Improves plant taste, palatability, and nutrient density
- Provides crucial minerals needed for: photosynthesis, nitrogen utilization, and other important biological and chemical systems in the soil, root zone and bodies of plants

Clay Conditioners

- Improves soil's ability to store and release water and nutrients (also known as cation exchange capacity) which helps reduce shock and make plants more stress tolerant
- Stimulates soil enzymes and nourishes a healthy microbe environment
- Offers an expansive and balanced mineral profile of over 60 trace minerals

SR 65 for Livestock Health

Effective mineral supplement for all classes of livestock that provides many health boosting advantages to your animals.

Mineral Salts

- High salt to mineral ratio means no more coercing stubborn animals to eat their minerals. Animals love Redmond and choose it every time over low salt/heavy mineral mixes.
- Replenishes needed electrolytes that reduces heat stress
- Contains 60+ trace minerals that improve overall animal health, leading to happier and more productive animals

Clay Conditioners

- Rich, bentonite clay particles contain Redmond's expansive mineral profile
- Binds to mold and other harmful toxins that can sometimes be found in feed, forage, or silage
- Promotes digestive health, especially in ruminants (buffers rumen pH, maintains healthy ammonia levels, and improves fiber digestion)
- Increases feed efficiency by helping your animals get more of what they naturally need out of their food intake

Nature Has It Right

Both you and your animals will enjoy using products free of chemical processing, and are harvested and packaged direct from nature. Need custom fortifications for deficient areas? Redmond offers custom mixes to meet your operation's exact needs.
